

Do you want to work for a Sustainable & Top 100 WealthTech company?

3rd-eyes analytics is a WealthTech company founded in 2015 that is primarily active in Europe and the US. We have won several high-profile banks, insurance companies and asset managers over the last years and have won many prestigious awards.

We are the partner of financial institutions for individual wealth planning and sustainable investing with the focus of planning an uncertain future. Sustainability is part of our DNA as we believe that sustainability risks (e.g., climate change) must be integrated into realistic wealth planning. We are expanding our team and are looking for a

Quant Developer (m/f, 60 - 100%)

Your Profile

- Experience in mathematical programming: Julia or Python
- Interest in financial markets and models of climate change
- Well versed in data science and statistics
- Risk management and capital market theory knowledge a plus
- Studies in Computer Science, Financial Engineering, Physics or Mathematics

Your Tasks

- You participate in the development and testing of our core computing engines
- You collaborate with our business development team in client-specific projects
- You collaborate with our DevOps team in the deployment of new products

We Offer

- Flexible working place in Zurich
- Growth perspective in a dynamic international team with flat hierarchy
- Entrepreneurial environment with a lot of creative freedom

We look forward to receiving your application!
